

## **Increased impact factor for Scand J Immunol**

Since 1972 the *Scandinavian Journal of Immunology*, the official journal of SSI, has played an active part in promoting the science of immunology as well as being the most important financial contributor to SSI activities. For 2015 the impact factor has increased from 1.739 to 2.270. Scandinavian immunologists should consider to actively help to increase this further. And please note when you publish papers in *Scandinavian Journal of Immunology* there are no page or handling charges. For further information: <http://www.blackwellpublishing.com/journals/sji/>
